Brief Interventions Service

Our Pop-up Clinic provision within primary care, community & workplace settings uses a recognised screening tool to identify potentially harmful & problematic alcohol & drug use amongst the public to identify those who need support.

Based on the result of screening, appropriate interventions are offered including, but not limited to:

- Advice and information
- Assessment of alcohol, drug and tobacco use
- Harm reduction advice
- Follow-up structured psychosocial interventions to enable people to address potentially harmful use
- Case management to support individuals to access services and interventions appropriate to their assessed needs
- Onward referral to services, where a need is identified through assessment and case management.
