Enhance Service

‘Enhance’ is a new support service for prevention and treatment of prescription medication dependence.

Aiming to support patients on high doses of prescribed opiates. We support patients who are registered with a Hull GP practice. Enhance aims to prevent dependence and support patients to reduce or stop prescription medications that can cause dependence, where the medications are no longer required.

Patients identified will receive:

- Harm reduction advice
- Provided with Naloxone if appropriate
- Information booklet on reducing opioids
- Triage to all patients referred
- Full holistic Assessment to all patients who would like to engage
- Ongoing psychosocial support
- Appointments within GP practice, telephone or Home Visits
