

Welcome to the new alcohol ‘early intervention’ service in Aspire

The Alcohol Early Intervention and Outreach Team.

“Frankee White, has the lead for the new service and outlines the service offer. “We

offer from 6 to 12 guided sessions, currently delivered over the internet or by telephone however we hope to provide some face-to-face sessions within the community later in the year.

The service focusses on those who wouldn’t normally use our services, who may be holding down a job, have supportive family and friends, but are finding that their alcohol consumption has been increasing. We want to help them manage their drinking within safe tolerances, so they don’t become dependent on alcohol”.

“Some people have long term health problems and don’t understand how alcohol can impact and amplify their condition or create associated health risks. Drinking more later in life can also cause problems, which we explain in our education sessions.”

Frankee is supported by Case Manager Alana Jury on the ‘pilot’ scheme, which is being match funded by Doncaster Council’s Public Health Department for an initial 12 months to assess its impact.
